

Product overview

Summary

ReadySetFly is a dual marketplace for general aviation:

- Rentals marketplace (Airbnb-style) for aircraft hourly bookings.
- Services marketplace (classifieds-style) for sales, CFIs, schools, mechanics, charter, and jobs.

Core value proposition

- Single account for pilots, owners, and service providers.
- Trust layer with identity and document verification.
- Messaging gate tied to rental status to reduce fraud and privacy risk.

Pilot tools and training suite

ReadySetFly takes a pilot-tools-first approach alongside the marketplaces, including:

- Digital logbook with endorsements and signatures.
- Flight planner with weather overlays.
- Student training hub (roadmaps, written prep, progress tracking).
- VOR trainer and GPS sims.
- Radio communications trainer and checklists.
- TFR map and approach plates.

Trust and safety layers

- Email and phone verification.
- Government ID (front/back) and selfie liveness check.
- Optional FAA certificate verification.
- Payment method on file requirement.
- Admin suspension for expired documents.

Business model

- Rentals: platform fee percentage per booking.
- Marketplace listings: tiered paid listings (duration-based).

Current status (from internal analysis)

- Web app, backend, and database are production-ready.
- Key blockers remain for owner payouts, messaging E2E validation, and automated rental completion.

TBD / confirm

- Active users, listings, and revenue to date.
- Customer acquisition metrics and retention.
